

Arena DevOps

FARO

Comprehensive portfolio of over 300 DevOps and Middleware capabilities to “level up” your application development and software support cloud architecture

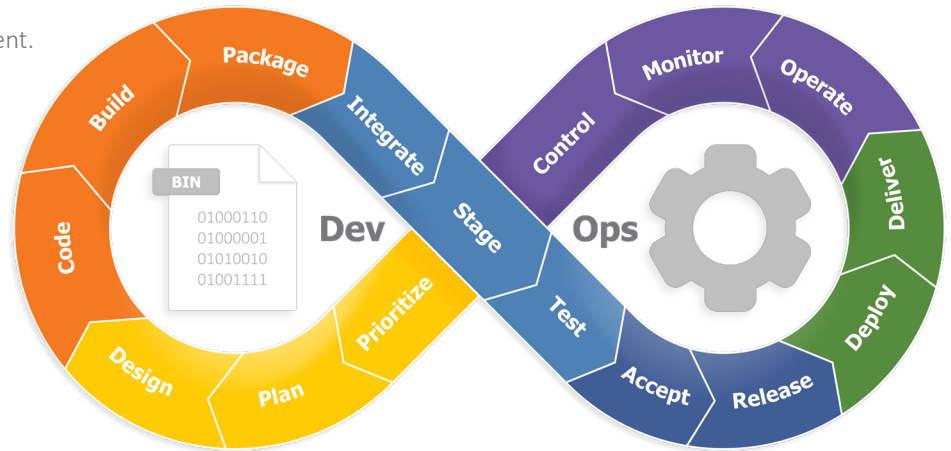

For organizations needing effective tooling to help teams rapidly and reliably deploy and innovate for their customers

Product Overview

Arena offers cloud hosted, pre-engineered, hardened, and fully supported DevOps capabilities across your full development and operations lifecycle + tools for data management.

Business Level Benefits

- Turnkey solutions
- Connected and adapted to your ecosystem
- Complete with playbooks for your team
- Tools are optimized and upgraded over time
- Software factory roadmap

Features

Security

Modernizing your development lifecycle to a complete SecDevOps program

Process

Focus on automation and developer-driven processing (including source control)

Zero Downtime Operations

Modern, scalable, and seamless technology innovation (including Kubernetes)

FARO Differentiators for Government

You can count on FARO’s Solutions to support customer confidence in IT execution:

- Pre-Engineered Solutions – We removed the “some assembly required” issues with low risk, proven solutions, that reduce delays in implementation
- Customer Site or Cloud Friendly – FARO works with any FedRAMP Moderate Public Cloud
- Team Support – We are integrated, with named resources that align as an extension of your existing team
- Deployment Support – Fully managed or shared responsibility
- Compliance Support – Unlike other vendors, FARO is at your side with NIST, FIPS, HIPAA, and State-specific compliance and audit tasks
- 24x7 Support – Our team is providing “around the clock” support including night and weekend deployments with your teams or on behalf of your teams
- Engineering Support – Connecting and supporting defined solutions in a complicated ecosystem of your environment

Compatibility Model

Arena DevOps can be integrated with numerous popular products including:

- Azure DevOps + AKS
- Red Hat Openshift
- AWS EKS, Lambda
- Elastic, Logstash, Kibana, Beats
- Gitlab, Jenkins, Chef, XLDploy, Grafana and more than 300+ other tools
